Highlights

- Similar if not higher volume than 40 meter competitors and shorter LOA being most cost effective
- Private use only with very little wear (sub 400 hrs on main engines)
- Recently completed warranty cycle equaling peak condition
- Capable of efficient cruising and comfortable high speeds
- 15% more fuel efficient than competitors at displacement speed
- Wave piercing hull form for max comfort and minimal vibration
- Rina class
- Dedicated beach club
- Best in class bow seating
- Zero Speed Stabilizers
- Fully covered and protected while in berth
- Full time crew

The Fast 125' is undoubtedly one of Benetti's most accomplished model:

- Use of carbon fibre in the superstructure means a 40% lighter lighter top, increasing fuel efficiency and reducing roll
- Rolls Royce Azipulls are not only more efficient and manoeuvrable than traditional propulsions, they're also quieter resulting in near silent and vibration free cruise. Must be experienced.
- Displacement to Planing D2P hull form with wave piercer bow to combine the advantages of a displacement hull at low speeds with those of a planing hull at high speeds
- Less length, more volume. All the advantages of a 38m's running costs with the space of a 40m (7 crew vs 8+ avg., lower berth price etc.)
- Depreciation proof; Benetti 11 hulls cap across all models creates scarcity while competitors can exceed 20 units
- Dedicated beach club
