Iconic superyacht of the charter industry, 67.50m (221'5) ICON lives up to her name: she is a true icon of superyacht design and a remarkable charter vessel with impressive records. She was delivered by Dutch yard Icon Yachts in 2010 as its very first yacht, designed by Redman Whiteley Dixon and built in steel and aluminium. The superyacht offers vast outside space over four expansive decks. ICON underwent a comprehensive refit in 2014 which added five metres to her length, as well as a host of new features. These include a five-metre infinity swimming pool, a six-person sauna, large gym and dive shop. She continues to evolve with the latest technologies for the pleasure of her charter guests. She boasts even more facilities both indoors and outdoors, making her the perfect all-season charter yacht.
