Category: [Motor Yacht](#)

The Alloy is built on the wake of the 40 Alloy, a very successful model of which 10 units were built and delivered since the launch back in 2007, but she is much more than a simple evolution!

The "Alloy" is a fast displacement yacht, built completely in alloy, sporting some unique features typical of much larger yachts (exceeding 50 metres) such as:

- a beach club/garage opening on three sides and extending on more than 100 square metres;
- an Owner's cabin of almost 90 square metres on three different levels, with private studio, private lounge, and separate access to the private forward deck;
- the garage for a 7 metre tender;
- there is a second forward garage for the rescue boat;
- the Owner's and guest areas inside the yacht are more than 270 square metres;
- there are more than 380 square metres of external spaces;
- a tunnel under the lower deck allows easy inspection of all systems and machinery;
- Bow manoeuvring area hidden under the main deck;
- Foldable Gangway;
- Glass bulwarks details on MD side corridor, UD aft and SD aft;
- Two stairs to access the SD to divide the crew and guests;
- MCA/LY3 criteria
- 480 GT
